

the customer in accordance with the stated terms of the transaction.

(D) A reflection on a billing statement of a telephone-billed purchase for a call made to an 800 or other toll free telephone number.

(E) The failure to reflect properly on a billing statement a payment made by the customer or a credit issued to the customer with respect to a telephone-billed purchase.

(F) A computation error or similar error of an accounting nature on a statement.

(G) Failure to transmit the billing statement to the last known address of the customer, unless that address was furnished less than twenty days before the end of the billing cycle for which the statement is required.

(H) Any other error described in regulations prescribed by the Commission pursuant to section 553 of title 5.

(3) The term “Commission” means the Federal Trade Commission.

(4) The term “providing carrier” means a local exchange or interexchange common carrier providing telephone services (other than local exchange services) to a vendor for a telephone-billed purchase that is the subject of a billing error complaint.

(5) The term “vendor” means any person who, through the use of the telephone, offers goods or services for a telephone-billed purchase.

(6) The term “customer” means any person who acquires or attempts to acquire goods or services in a telephone-billed purchase.

§ 5801. Findings

The Congress finds that—

(1) commercial activities of the private sector have substantially contributed to the

strength of both the United States space program and the national economy;

(2) a robust United States space transportation capability remains a vital cornerstone of the United States space program;

(3) the availability of commercial launch services is essential for the continued growth of the United States commercial space sector;

(4) a timely extension of the excess third party claims payment provisions of chapter 701 of title 49 is appropriate and necessary to enable the private sector to continue covering maximum probable liability risks while protecting the private sector from uninsurable levels of liability which could hinder international competitiveness;

(5) a program to demonstrate how recipients of Federal grants can purchase launch services directly from the private sector has the potential to improve the capabilities of the United States commercial launch industry;

(6) improvements and additions to the Nation’s space transportation infrastructure contribute to a robust and cost effective space transportation capability for both public sector and private sector users;

(7) private sector use of available Government facilities on a reimbursable basis contributes to a stronger commercial space sector;

(8) the Federal Government should purchase space goods and services which are commercially available, or could be made available commercially in response to a Government procurement request, whenever such goods or services meet Government mission requirements in a cost effective manner;

(9) it is appropriate for the Government to act as an anchor tenant for commercial space development projects which have a reasonable potential to develop non-Federal markets and which meet Federal needs in a cost effective manner; and

(10) the provision of compensation to commercial providers of space goods and services for termination of contracts at the convenience of the Government assists in enabling the private sector to invest in space activities which are initially dependent on Government purchases.

CODIFICATION

In par. (4), “chapter 701 of title 49” substituted for “the Commercial Space Launch Act [49 App. U.S.C. 2601 et seq.]” on authority of Pub. L. 103-272, §6(b), July 5, 1994, 108 Stat. 1378, the first section of which enacted subtitles II, III, and V to X of Title 49, Transportation.

SPACE COOPERATION WITH FORMER SOVIET REPUBLICS

Section 218 of Pub. L. 102-588 provided that:

“(a) REPORT TO CONGRESS.—Within one year after the date of enactment of this Act [Nov. 4, 1992], the President shall submit to Congress a report describing—

“(1) the opportunities for increased space related trade with the independent states of the former Soviet Union;

“(2) a technology procurement plan for identifying and evaluating all unique space hardware, space technology, and space services available to the United States from the independent states of the former So-
